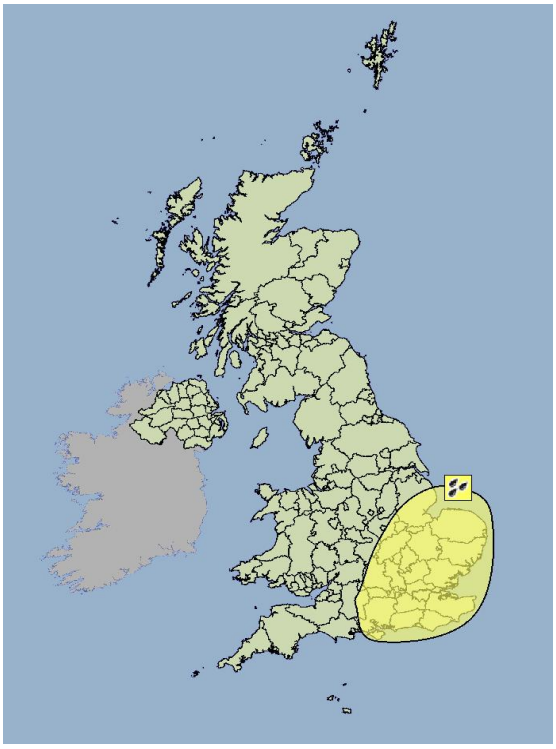
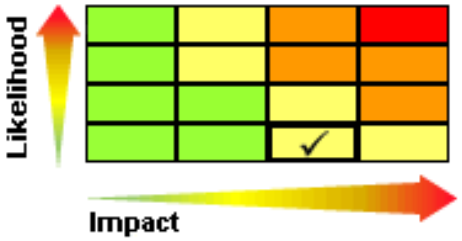
National Severe Weather Warning Service





Chief Forecasters Assessment
A slowly southward moving weather system will give 15-30 mm of rain quite widely across the area, with perhaps as much as 60-80 mm in places through the whole day. In some places 20-30 mm could fall within 2 or 3 hours. At this stage there remains uncertainty in the exact location of the largest rainfall totals.

This is an update to extend the warning area slightly west and north.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **00:05 on Wed, 09th Aug 2017** until **23:55 on Wed, 09th Aug 2017**

An area of heavy rain will sink slowly southwards across the east and southeast of England during Wednesday.

Some transport routes may be affected by localised flooding leading to longer journey times. In addition, flooding of homes and businesses is possible.

The heaviest of the rain should gradually become confined to the extreme southeast of the UK later in the day.
